At 2,995 metres, the main summit of the Dachstein Mountains is one of the highest elevations in the Northern Alps. The Dachstein is extremely formative for the emergence of the Salzkammergut. A large part of the Salzkammergut lakes are former glacial lakes of the Dachstein Glacier. With the first ascent of the Hohe Dachstein on 18.7.1834, the tourist success story of mountaineering in this region began. A little later, Friedrich Simony built the world's first via ferrata here. In the middle of the last century, the cable car was built. The tour described here also uses the cable car as an ascent aid. This tour harmoniously combines scenic highlights and differences in altitude. Look forward to a charming hiking trip through diverse landscapes and the encounter with a true "mountain personality"!
